Subject: RE: US 17/92 Mast Arm Conversions - Status Update

Yes, we would like reimbursement of the \$1300 for title research after the fact. We hope to have design complete by October 1st, so need to know soon about the characteristics of the easements and whether or not we would need to acquire right-of-way for 2 of the intersections. We will process the paperwork now for the title work using our funds and if possible, get reimbursed once the CRA approves the request. Once design is complete in September, I should have a good handle on time frames for all 8 intersections and would be happy to answer any and all questions. For now, I am anticipating all Phase I signals to start construction by January 1, 2015 and all Phase II signals to start in the summer or fall 2015, after any necessary right-of-way takings.

Thank you and please contact me with any questions.

Charlie

Did you want to modify this request in any way? I know our approval timing may impact the progress...
