This map is for use in administering the National Flood Insurance Program. It does not necessarily depict areas subject to flooding from flood damage of small size. The community map should be consulted for this purpose.

Special Flood Hazard Areas (SFHAs) subject to the 1% annual chance flood are shown on this map. Baseline flood elevations (BFEs) determined. For areas of alluvial fan flooding, velocities also determined.

Base map information shown on this FIRM was provided in digital form by the National Geodetic Survey, NOAA.

Base map information shown on this FIRM was derived from sources and materials created by the U.S. Department of Agriculture, Forest Service; U.S. Geological Survey; National Geodetic Survey, NOAA; and others.

To determine if flood insurance is available in this community, contact your insurance agent or call 1-800-358-9620 and its website at http://www.floodsmart.gov.

Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.

Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths shown on this map, please contact the Information Services Branch of the National Flood Insurance Program at the following number: 1-877-FEMA MAP (1-877-336-6275) or write to: Federal Emergency Management Agency, National Flood Insurance Program, Federal Insurance Administration, P.O. Box 63113, New Orleans, LA 70189-9909. Please have the following information handy in order to receive accurate assistance: (1) your name, address, and telephone number; (2) the name and dates of the FIRM you need; and (3) the FIRM panel number. Please refer to the legend for information concerning the legend codes used on this map.

Areas in which flood hazards are undetermined, but possible. Base Flood Elevations determined. For areas of alluvial fan flooding, velocities also determined.

Areas of special flood hazard formerly protected from the 1% annual chance flood. Inundation by the 1% annual chance flood event shown in light blue. Special Flood Hazard Areas (SFHAs) subject to protection from the 1% annual chance or greater flood. Base Flood Elevations determined. For areas of alluvial fan flooding, velocities also determined.

Flood depth of 1 to 3 feet (usually areas of ponding). Areas in which flood hazards are undetermined, but possible. Base Flood Elevations determined. For areas of alluvial fan flooding, velocities also determined.

Base map

Profile Base Line

Vertical Datum

Geographic coordinates referenced to the North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations and/or may not be precise. Elevations listed in the Summary of Stillwater Elevations table should be used for construction. Elevations in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Elevations determined. For areas of alluvial fan flooding, velocities also determined.
