**BACKGROUND:**

The applicant, Jay Barfield, requests approval of R-1AAA zoning on a 5.1-acre site on Gabriella Lane, west of Tuskawilla Road. Located in the Low Density Residential future land use designation, the property is programmed under the Vision 2020 Plan for a maximum of 4 units per net buildable acre. However, as a request for conventional zoning (i.e., not PUD), the application is subject to the lot compatibility analysis required under Ordinance 98-53. This analysis supports the requested zoning classification of R-1AAA.

**STAFF RECOMMENDATION:**

Staff recommends APPROVAL of the requested R-1AAA classification.

COMMISSION DISTRICT	District 1 (Maloy)

### OVERVIEW

The applicant, Jay Barfield, requests approval of R-1AAA zoning on a 5.1-acre site on the north side of Gabriella Lane, west of Tuskawilla Road. If the requested rezone is approved, the applicant intends to develop the site in 9 single family lots ranging in size from approximately 14,000 to 24,000 square feet. Minimum lot size in R-1AAA is 13,500 square feet.

Located in the Low Density Residential (LDR) future land use designation, the property is programmed under the Vision 2020 Plan for a maximum of 4 units per net buildable acre. However, as a request for conventional zoning (i.e., not PUD), the application is subject to the lot compatibility analysis required under Ordinance 98-53. This analysis supports a zoning classification of R-1AAA.

The analysis evaluates appropriate zoning for a given parcel on the basis of existing zoning on surrounding properties within 660 feet. The calculations assign differing weights to the various districts according to permitted development intensities within those districts. For example, the R-1A district, with a minimum lot size of 9,000 square feet, has a weight factor of 8, while R-1AAAA, requiring half-acre lots, has a weight factor of 5. Properties zoned for Agriculture (A-1) receive a base weight of 4, but additional points can be assigned where water, sewer, and paved roads are available, for a maximum of 7. Weighting factors, together with the acreage of each zone within the 660-foot radius, determine the "compatible" zoning for the subject property.

The analysis area adjoining this request is developed predominantly as single family residential at densities consistent with the LDR land use designation. While adjoining properties to the north and west remain in agricultural zoning at semi-rural densities, this development type is now somewhat unusual in the area.

The lot compatibility analysis yielded a weight rating of 6.86, which corresponds to the requested R-1AAA district.

**Existing Land Uses:** The existing zoning designations and land uses are as follows:

	<b>Zoning</b>	<b>Future Land Use</b>	<b>Existing Land Use</b>
<b>North</b>	A-1	LDR	single family
<b>South</b>	R-1AA	LDR	single family
<b>East</b>	R-1AAA/R-1AAAA	LDR	single family
<b>West</b>	A-1	LDR	single family

For more detailed information regarding zoning and land use, please refer to the attached map.

## **SITE ANALYSIS**

### **Facilities and Services:**

1. Adequate facilities and services must be available concurrent with the impacts of development. If required by the concurrency review, additional facilities and services will be identified.
2. The proposed zoning is consistent with the adopted future land use designation assigned to the property, and does not alter the options or long range strategies for facility improvements or capacity additions included in the Support Documentation to the Vision 2020 Plan.
3. Seminole County will provide water service to the site. Sewer service is not available.
4. Information on stormwater capacity and outfall will have to be provided prior to Final Subdivision approval.

**Compliance with Environmental Regulations:** At this time there are no concerns regarding compliance with environmental regulations.

**Compatibility with surrounding development:** The proposed R-1AAA zoning classification is compatible with the Low Density Residential land use designation.

### **STAFF RECOMMENDATION**
