OVERVIEW

Zoning Request: The applicant, Mason Chickonski, requests R-2 zoning for approximately 0.22 acres, located on the west side of CR 419 between W. 8th Street and W. 10th Street, to accommodate a duplex. The subject property has an R-3 zoning classification. The land use for the property is HDR (High Density Residential) which allows the proposed R-2 zoning classification.

North of the subject parcel are residential lots zoned R-2 and R-3, and a parcel at the intersection of CR 419 and W. 8th Street is zoned RP, Residential Professional. East of the parcel are residential lots zoned R-1. West of the parcel are residential lots zoned R-3. South of the subject parcel is an unopened right-of-way (9th Street) and across unopened 9th Street are parcels zoned C-2, Retail Commercial. The existing R-3 designation allows for one or two story apartment buildings with a maximum density of 13 units per net buildable acre. The requested zoning of R-2 permits one and two family dwellings on a minimum 9,000 square foot lot, while accommodating setbacks and necessary site improvements. The subject parcel meets the dimensional requirements of the proposed R-2 zoning district.

Existing Land Uses:

	EXISTING ZONING	FUTURE LAND USE
NORTH	R-3 (Multiple-family Dwelling) and R-2 (One- and Two- family Dwelling)	High Density Residential and Medium Density Residential, Office
SOUTH	C-2 (Retail Commercial)	Commercial
EAST	R-1 (Single-family Dwelling)	Low Density Residential
WEST	R-3 (Multiple-family Dwelling)	High Density Residential

For more detailed information regarding zoning and land use, please refer to the attached map.

SITE ANALYSIS

Facilities and Services:

The proposed zoning is consistent with the adopted future land use designation assigned to the property and does not alter the options or long range strategies for facility improvements or capacity additions included in the Support Documentation to the Seminole County Comprehensive Plan.

Transportation / Traffic:

Access is available to the site from CR 419. The proposed R-2 zoning will allow less density than the current R-3 zoning designation, and will result in less traffic impacts.

Compliance with Environmental Regulations:

There are no identified flood prone areas associated with this property. The parcel lies within the Econlockhatchee River Protection Overlay Zoning District. At the time of site development, the property will be subject to the regulations contained in Part 57 of the Seminole County Land Development Regulations.

Compatibility with Surrounding Development:

Currently, the surrounding area has High Density Residential, Medium Density Residential, and Low Density Residential land use designations. The proposed R-2 zoning classification is allowed in either the High or Medium Density Residential land use designations, and therefore, the proposed zoning is compatible with the surrounding area.

STAFF RECOMMENDATION

Staff recommends approval of the requested R-2 zoning classification to accommodate a duplex based on the following findings:

1. The proposed use within the R-2 zoning district would not be detrimental to the character of the area or neighborhood or inconsistent with the trends of development in the area; and
2. The proposed use within the R-2 zoning district would not be incompatible with the concepts of high density residential land use; and
3. The uses within the proposed R-2 zoning district would not have an unduly adverse effect on existing traffic patterns, movements and intensity; and
4. The proposed R-2 zoning district is compatible with the concepts of its future land use designation of High Density Residential.
