Wetland Impacts:

Based on preliminary aerial photo and County wetland map analysis, no portion of the site appears to be located within a wetland.

PUBLIC FACILITY IMPACTS

Rule 9J-5.0055(3)(c)1-2, Florida Administrative Code, requires that adequate public facilities and services be available concurrent with the impacts of development. The applicant has elected to defer Concurrency review at this time and therefore, has submitted an Affidavit of Concurrency Review Deferral. The applicant is required to undergo Concurrency Review prior to final engineering approval.

The following table depicts the impacts the proposed development has on public facilities:

Public Facility	Existing Zoning (A-1)	Proposed Development*	Net Impact
Water (GPD)	350	800	450
Sewer (GPD)	300	800	500

Utilities:

The site will have utilities furnished by Seminole County. There is currently a 12-inch gravity sewer main and a 16-inch water main on the north side of SR 426 (Aloma Ave). Additionally, the subject property is located within the ten year master plan for reclaimed water. Therefore, an alternative source of water, such as a shallow well will be required until reclaimed water becomes available.

Transportation / Traffic:

The property accesses SR 426 (Aloma Ave), which is classified as an arterial roadway. SR 426 is currently operating at a level-of-service "A". An FDOT access permit will be required for access to the site. SR 426 (Aloma Ave) is not currently programmed to be improved according to the County 5-year Capital Improvement Program.

School Impacts:

The proposed development will not generate any school impacts.

Public Safety:

The nearest response unit to the subject property is Station # 27, which is located at 5280 Red Bug Lake Road. The County level-of-service standard for an adequate response time is 5 minutes, per Policy PUB 2.1 of the Comprehensive Plan. Prior to final site plan approval, any proposed development will

be reviewed for compliance with Appendix G (Seminole County Public Safety Standards) of the Land Development Code.

Drainage:

The proposed project is located within the Howell Creek Drainage Basin, which is an open basin that eventually flows to Lake Jesup then into the St Johns River. A detailed drainage analysis will be required at final engineering, which will outline all retention requirements.

Parks, Recreation and Open Space:

The applicant shall provide a minimum of 25 percent open space on the property, per Section 30.1344 (Open Space Ratios and Design Guidelines) of the Land Development Code.

Buffer and Sidewalks:

The subject site is adjacent to properties with non-residential Future Land Use Designations, so the applicant will not be required to provide any buffering to adjacent properties. However, if the applicant's parking lot is adjacent to SR 426 a landscape buffer will be required.

Per Appendix A of the Seminole County LDC, the applicant will have to construct a sidewalk along their property frontage on SR 426 at a minimum five feet in width.
